

# THE NEW SPIRIT OF ASIA

Thai Aerospace Industries is a Total Technical Care maintenance and asset management organisation with a global presence and two decades of worldwide experience. The company has a well-established reputation in innovative solutions, digitalised MRO services, maintenance training and proven track record as a one-stop total technical care organization for airlines, asset owners, OEMs and operators.

It is headquartered in Bangkok, along with multiple locations across the world.

### Our business DNA:

We believe that the global MRO market has been shaped by incumbent MRO companies, some of which long ago forgot the true meaning of real customer service.

We see major inefficiencies in aviation assets, labor and technology, and believe we can unlock additional value for our customers and partners. Because of the above mentioned problems with the industry we could not stand aside. Magnetic MRO was born with a mission to reinvent existing business models and deliver superior customer experience to the global MRO industry.

## A truly independent MRO for Thailand

Regional one-stop alternative to global MRO brands
